Contents

Coastal Engineering, Volume 11 (1987)

Research Papers

2DH mathematical modelling of morphological evolutions in shallow water
H.J. de Vriend (Emmeloord, The Netherlands) 1

A numerical modelling study of low-frequency circulation on the West Florida Shelf
C.K. Cooper (Ponca City, OK, U.S.A.) 29

Bethymetric and shear stress effects on an island's wake: a computational model study
R.A. Falconer and L. Mardapitta-Hadjipandeli (Birmingham, England) 57

Discussion

An approximate model for nonlinear dispersion in monochromatic wave propagation models, by J.T. Kirby and R.A. Dalrymple
• Discussion – T.S. Hedges (Liverpool, England) 87
• Reply – J.T. Kirby and R.A. Dalrymple (Gainesville, FL, U.S.A.) 89

Research Papers

Source generation on nonlinear gravity waves with the boundary integral equation method
M. Brorsen (Aalborg, Denmark) and J.J. Larsen (Horsholm, Denmark) 93

The continuity equation for longshore current velocity with breaker angle adjusted for a wave-current interaction
C. Galvin (Springfield, VA, U.S.A.) 115

Long-term variation of longshore sediment transport
Xie Shi-Leng and Liu Teh-Fu (Tianijn, P.R. China) 131

Long-wave transmission through porous breakwaters
P.D. Scarlatos (West Palm Beach, FL, U.S.A.) and V.P. Singh (Baton Rouge, LA, U.S.A.) 141

An energy approach to non-breaking wave-induced motion of bottom sediment particles
M.A. Losada, J.M. Desiré and J. Merino (Santander, Spain) 159

Discussion

Sediment by-passing across coastal inlets, by R. Silvester
• Discussion – P. Bruun (Trondheim, Norway) 175
• Reply – R. Silvester (Nedlands, W.A., Australia) 178

Book Reviews

Developments in Hydraulic Engineering, 2, by P. Novak – S. Vigander 183

Design and Construction of Mounds for Breakwaters and Coastal Protection, P. Bruun (Editor) – R. Silvester 185

Wave Energy: A Design Challenge, by R. Shaw – G.T. Hebenstreit 186

Announcement 188

Research Papers

Forces on a smooth submarine pipeline in random waves – Comparative study
N. Jothi Shankar, H.-F. Cheong and K. Subbiah (Singapore) 189

Stability of breakwater armour layers – Design formulae
J.W. van der Meer (Emmeloord, The Netherlands) 219

Analysis of wave fields generated by a directional wavemaker
Y.C. Wu (Taiwan, Republic of China) and R.A. Dalrymple (Newark, DE, U.S.A.) 241

Laboratory studies of breaking wave forces acting on vertical cylinders in shallow water
C.J. Apelt and J. Piorewicz (St. Lucia, Qld., Australia) 263

Scaling the rate of wind-blown sand transport by parameterization of the turbulent energy equation
S.A. Hsu (Baton, LA, U.S.A.) 283

Discussion
Model and prototype tests for wave impact and run-up on a uniform 1:4 slope, by A. Führböter
• Discussion - P. Bruun (Trondheim, Norway) 291
• Reply - A. Führböter (Braunschweig, F.R. Germany) 293

Research Papers
Measurements of forces resulting from normal and oblique wave approaches to small scale sea walls
A.F. Whillock (Wallingford, U.K.) 297
Measuring waves with pressure transducers
C.T. Bishop and M.A. Donelan (Burlington, Ont., Canada) 309
An efficient finite-difference approach to the mild-slope equation
P.A. Madsen and J. Larsen (Horsholm, Denmark) 329
Sediment concentration measurements by transverse suction
J.J. Bosman (Emmeloord, The Netherlands), E.T.J.M. van der Velden (Delft, The Netherlands) and C.H. Hulsbergen (Emmeloord, The Netherlands) 353
Calculating bottom orbital velocity beneath waves
R.L. Soulsby (Wallingford, U.K.) 371
Wave power variation in the near-shore regions
M.M. Purandare and P.A. Aswatha Narayana (Madras, India) 381

Special Issue

JONSMOD'86 — P.P.G. Dyke (Editor)

Editorial 391
Comparison of 2-D and 3-D models of the steady wind-driven circulation in shallow waters
B.M. Jamart and J. Ozer (Liège, Belgium) 393
Formulation of a continuously stratified sea model with three-dimensional representation of the upper layer
G.K. Furnes (Nygaardstangen, Norway) and M. Mork (Bergen, Norway) 415
On extracting current profiles from vertically integrated numerical models
A.M. Davies (Merseyside, Great Britain) 445
Tidal sea mathematical modelling: Current applications and future developments
Y. Coëffé, S. Courtier and B. Latteux (Chatou, France) 479
A Lagrangian model for wind- and wave-induced near-surface currents
A.D. Jenkins (Trondheim, Norway) 513
A swell model of the German Bight
J.W. Dippner (Hamburg, F.R. Germany) 527
Computation of the driving forces of wave-induced currents
M.W. Dingemans (Delft, The Netherlands), A.C. Radder (Rijswijk, The Netherlands) and H.J. de Vriend (Delft, The Netherlands) 539
Quasi-3D modelling of nearshore currents
H.J. de Vriend and M.J.F. Stive (Delft, The Netherlands) 565
Implementation and testing of a lateral boundary scheme as an open boundary condition in a barotropic ocean model
E.A. Martinsen and H. Engedahl (Oslo, Norway) 603
